NGUYỄN TIẾN KHANG HUY

MOBILE INTERN - ANDROID

CAREER OBJECTIVE:

Android intern focused on developing programming skills on the Android platform using Kotlin and Java, contributing to real-world projects, and refining personal skills throughout the internship.

EDUCATION

HANOI UNIVERSITY OF NATURAL RESOURCES AND ENVIRONMENT

Major : Information Technology

08/2021 - 06/2025

4th year student, completed all school courses

PROJECT

HUY'S COFFEE SHOP - ONLINE DRINK ORDERING APP

Link: <https://github.com/khanghuy2003/android-project>

09/2024 - 11/2024

Number of project members: 1 member.

Project Overview:

The application allows customers to order drinks online on their phones without having to go directly to the store, and can also manage their shopping cart and view details of the orders they have placed.

Technology Stack:

- **Programming Languages:** Kotlin (primary), XML for UI layout
- **Database & Cloud Services:** Firebase Realtime Database for real-time data synchronization, Firebase Authentication for secure user login, Firebase Storage for image handling.
- **Libraries and Tools:** Android Studio (IDE), Genymotion for testing, Glide for image loading.

Key Features:

- **Product Browsing and Categorization:** Displays items with images, names, prices, and descriptions. Users can filter products by category and view top-selling items.
- **Cart Management:** Users can add items to their cart, with options to adjust quantity, size, and toppings. If an item already exists in the cart, it updates the quantity and price instead of adding duplicates.
- **Order Processing:** Provides an order placement system where users enter recipient details. Orders are saved to Firebase, along with order date, time, and status.
- **User Authentication:** Features login, registration, and logout options to secure and personalize user sessions.
- **Data Management:** Users can add, edit, or delete products, manage orders, and view order history.

★ TECHNICAL SKILLS

Programming Languages:

- Kotlin
- Java
- XML

Development Tools:

- Android Studio
- SQLite
- MySQL
- Firebase
- Genymotion

Architectures and Development

Models:

- OOP (Object-Oriented Programming)
- MVC (Model-View-Controller)
- MVVM (Model-View-ViewModel)

🌐 ENGLISH

Basic English level, able to listen and read English texts.
